UNITED STATES DEPARTMENT OF AGRICULTURE

SERVICE AND REGULATORY ANNOUNCEMENTS

BUREAU OF ANIMAL INDUSTRY

DECEMBER 1933

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry Free distribution is limited to persons in the service of the Bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D C., at 5 cents each or 25 cents a year (foreign, 45 cents). A supply will be sent to each official in charge of a station or branch of the Bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

CHANGES IN DIRECTORY

Meat Inspection Withdrawn

43. Philip B. Newmark, Inc., 1202–1204 Metz Street, Brooklyn, N.Y.
143. Almar Stores Corporation, Tenth and Somerville Streets, Philadelphia, Pa.

Change in Name of Official Establishment

996. Walter and Irving Blumenthal, 403–409 East Forty-fourth Street, New York N.Y., instead of United Dressed Beef Co.

Change in Address of Official in Charge

Dr. G. R. Hartman, 66 Federal Building, Chattanooga, Tenn., instead of 402 Post Office Building.

Dr. F. N. Elwell, 228 Federal Building (mail P.O. box 2131, Wichita, Kans.), instead of 304 Federal Building.

NOTICES REGARDING MEAT INSPECTION

FOREIGN MEAT-INSPECTION OFFICIALS

Names and specimen signatures of foreign officials who have been authorized by their national governments to sign and issue foreign meat-inspection certificates for meat and meat food products exported to the United States are as follows:

Country and name	Signature
BRAZIL Dr. Carlos Pantoja	Carlos Pantoja
NORWAY S. Moe	S. Moe

SPECIAL REQUIREMENTS FOR FRESH MEAT CUTS EXPORTED TO ENGLAND AND WALES

Referring to the notice in Service and Regulatory Announcements of June 1933 concerning fresh meat and organs for England and Wales, the Bureau has been officially informed that in order to insure uniformity of practice in administering the regulations the Association of Port Sanitary Authorities of the British Isles has considered certain cuts of imported meat in regard to which difficulties might arise and adopted recommendations as to the inclusion in such cuts of the lymphatic glands and/or serous membrane in close anatomical relationship thereof. The list of cuts and recommendations, which become effective March 31, 1934, is as follows:

PORK CUTS

Cut	Recommendation
A.C. hams Pork legs	All pork hams should have the popliteal gland, the superficial inguinal or supra-mammary glands in situ.
Bellies Cumberland sides	Should have both pleura and peritoneum in situ.
Pork loins	The pleura, peritoneum and the renal and lumbar lymphatic glands should be left in situ.
Picnic hams Boston butts (boneless) Boston butts (bone in) Pork roasts Boneless shoulders	These are cuts from the shoulder and the prescapular gland should be left in situ.
Back fat	Consist entirely of the rind and fat from the back. There are no lean, no bone, and no glands. Compiles with the regulations and should be admitted.

BEEF AND MUTTON CUTS

Cut	Recommendation
With bone	
Beef buttock	The popliteal lymphatic gland and the superficial inguinal or supra-mammary gland should be left in situ.
Clod and sticking piece	Half of the prescapular gland should be left in situ.
Fore rib	The pleura and the dorso-costal lymphatic glands should be left in situ.
Rib and pony	Half the prescapular gland, the dorso-costal lymphatic glands and the pleura should be left in situ.
Rump and loin	The cut should be made through the precrural lymph gland so that part of this gland is available for inspection in this cut, the other part being included in the thick flank. In addition the iliac, lumbar, and renal lymphatic glands, the peritoneum and as far as possible half of the ischiatic lymph gland should be left in situ.
Saddle of mutton	The iliac, lumbar, renal glands and the peritoneum should be left in situ.
Without bone	
Beef fillets Tenderloins	Should be accepted in spite of the fact that neither lymphatic glands nor peritoneum are available for inspection.
Beef hams	The popliteal gland should be left in situ.
Clod and sticking piece	Half the prescapular gland should be included in this cut.
Shins	Should be accepted though no glands are available for inspection.
Silverside Topside	Each should contain half the popliteal lymphatic gland.
Sirloin butts	Should be accepted though there are no glands or serous membrane available for inspection.
Sirloin strips	All the pleura belonging to the part and as much peritoneum as possible should be left in situ.
Spencer rolls	In the preparation of this cut the pleura should be incised down the middle of each rib. The ribs should then be removed without tearing away any of the pleura, the cut edges of which will fall together and so leave the whole surface of this serous membrane available for inspection.
Thick flank	Half the precrural lymph gland should be left in situ.
Tongues Ox (short cut). Sheep.	Should not be trimmed closely. The fat in which the submaxillary lymphatic glands lie, together with such glands should be left in situ.
Quarters of beef (fores and hinds).	All lymphatic glands and all serous membranes should be left in their natural positions.

ANIMALS SLAUGHTERED UNDER FEDERAL MEAT INSPECTION, NOVEMBER 1933 [1]

Station	Cattle	Calves	Sheep and lambs	Goats	Swine
Baltimore	7,332	1,380	1,184	--------	71,798

November 1932	7,058,347	4,164,854	16,634,745	6,227	40,661,374
New York, Brooklyn, Jersey City and Newark [3]	39,247	53,493	256,222	--------	220,956

[1] Horses slaughtered:

November 1933	3,213
November 1932	5,616
11 months ended:	
November 1933	38,322
November 1932	58,866

[2] Included in "All other stations."

[3] The slaughter figures in this group of cities are included in the figures above for "New York" and "All other stations" and are combined here to show total in the Greater New York district.

Inspections of lard at all establishments, 145,899,460 inspection pounds; compound and other substitutes, 31,251,650 inspection pounds; sausage, 59,523,725 inspection pounds; oleomargarine, 8,774,550 inspection pounds.

Corresponding inspections for November 1932: Lard, 135,230,508 inspection pounds; compound and other substitutes, 27,498,256 inspection pounds; sausage, 53,617,526 inspection pounds; oleomargarine, 6,141,600 inspection pounds.

(These totals of inspection pounds do not represent actual production as the same product may have been inspected and recorded more than once in the process of manufacture.)

CAUSES OF CONDEMNATION OF CARCASSES, OCTOBER 1933

Cause	Cattle	Calves	Sheep and lambs	Swine
Emaciation	1,295	140	421	46
Hog cholera	--------	--------	--------	2,715

PROCEEDINGS UNDER THE PACKERS AND STOCKYARDS ACT

Docket no. 390.—In re B. W. Gillespie, doing business as the Gillespie Commission Co., market agency, Indianapolis, Ind. The Acting Secretary of Agriculture on July 15, 1932, issued an inquiry alleging that respondent had violated the Packers and Stockyards Act in that he was insolvent and had failed to execute and maintain a reasonable bond with suitable trustees to secure the performance of his obligations incurred as a market agency. This department has been officially advised that a bookkeeper of respondent embezzled sufficient sums of money to render respondent insolvent, all of which money has been paid back to the shippers or such claims are in process of settlement, and that respondent is no longer in business as a market agency or dealer at any stockyard but is now an employee of another registrant. Therefore, on December 6, 1933, this proceeding was dismissed without prejudice.

Docket no. 422.—In re Moog and Greenwald, market agency, Chicago, Ill. The Acting Secretary of Agriculture on July 25, 1933, issued an inquiry alleging that respondent had violated the Packers and Stockyards Act in that it had failed, neglected, and refused to execute and maintain a reasonable bond to suitable trustees to secure the performance of its obligations incurred as a market agency. On October 17, 1933, respondent admitted the truth of the matters alleged and waived a hearing thereon, and on November 11, 1933, filed a trust-fund agree-

ment which is satisfactory to the Chief of the Bureau of Animal Industry in lieu of a surety bond. On December 6, 1933, respondent was ordered to cease and desist from doing business as a market agency without executing and maintaining a reasonable bond, or without submitting some other form of indemnity which would afford substantially equivalent protection.

Docket no. 428.—In re Veach Commission Co., market agency, St. Louis, Mo. The Acting Secretary of Agriculture on August 22, 1933, issued an inquiry alleging that respondent was insolvent in that it was unable to pay its debts as they became due in the usual course of business. On November 3 and 13, 1933, hearings were held and evidence submitted establishing the insolvency of respondent as alleged in the inquiry. On December 6, 1933, respondent was suspended from registration as a market agency for 6 months with leave during said period to apply for a revocation of this suspension upon satisfactory proof to the Secretary that it is then solvent.

RESULTS OF PROSECUTIONS FOR VIOLATIONS OF LAWS

Penalties and fines have been imposed in prosecutions for violations of regulatory laws, as reported to the Bureau, as follows:

Twenty-eight Hour Law

Pennsylvania Railroad Co. (2 cases), $200 penalties.
Wabash Railway Co., $100 penalty.

Meat Inspection Law

For offering uninspected meat for interstate transportation: Benjamin Polakoff, Philadelphia, Pa., $1,000 fine and 3 months' imprisonment.

OFFICIAL STATISTICS AND THEIR INTERPRETATION

The attention of Bureau employees is called to an order of the Executive Council dealing with the publication or public discussion of Federal statistics. Bureau employees will be governed by the following procedure:

Statistics relating to general activities, particularly when already made public in printed or mimeographed reports, may be quoted and used together with explanatory comment of factual nature. On the other hand, Government statistics relating to employment, reemployment, and finances, especially when they pertain to work of other Federal agencies or that affect policies of administration, should not be interpreted or publicly discussed without first obtaining from the Washington office official approval of proposed statements. The purpose is to insure the accurate and proper presentation of official statistical data.

NEW PUBLICATIONS OF THE BUREAU

[The Bureau keeps no mailing list for sending publications to individual employees but sends copies to officers in charge of stations and offices. These publications should be regarded as notification copies. So far as possible additional copies will be furnished on request.]

Technical Bulletin 397. Comparison of Grain Rations for Beef Calves Before and After Weaning. By W. H. Black, Animal Husbandry Division, and E. A. Trowbridge, University of Missouri. Pp. 16.
